RE: Case Number 4:20cr00418 Jar (NAB)

Honorable Judge Baker,

I'm writing to notify the court that the time extension request filed on my behalf in regards to my case was done without my knowledge and permission. In addition the prosecution still has not given all of the discovery it promised back in October of 2020 in your courtroom. The discovery they have given thus far is inconsistent as far as file types. It is clear the ~~Government~~ is trying to make it ~~difficult~~ to even read it. The majority of the files are of an incompatible file format and can't be opened. I have literally received over one million pages from the government and a large percentage are use less, not to mention video clips that cannot be opened as well.

It may be improper but I'm writing so these issues may be placed on written record. I'm also requesting that the government please provide me with hard copies of my discovery. As you know I am currently in detention and have very limited access to electronic devices to view the files in current format.

Thank You

James T. Norman
